

SERVICE PROVIDER AGREEMENT (“AGREEMENT”)

Between

CENTRE FOR ADDICTION AND MENTAL HEALTH IN RESPECT OF ITS DRUG AND ALCOHOL TREATMENT
INFORMATION SYSTEM PROGRAM (“CAMH”)

-and-

THE HARM REDUCTION HEALTH SERVICES PROVIDERS WHO ENTER INTO AN ADHESION
AGREEMENT (individually, an “HR HSP” and collectively, “HR HSPs”)

Dated as of the 12 day of March, 2019 (“Effective Date”)

BACKGROUND

- A. CAMH responded to, and was successful in its bid for, an invitation for proposals sent by the Ministry of Health and Long Term Care (“MOHLTC”) to develop, implement and support an application for use by the Province’s thirty-six Public Health Units (“PHUs”) and affiliated HR HSPs.
5
- B. Harm reduction reduces the adverse health, social and economic consequences of the use of legal and illegal psychoactive drugs (www.canadianharmreduction.com), and reduces harms associated with drug use, without requiring cessation. The MOHLTC currently supports harm reduction through programs such as needle exchange/syringe programs, injection drug use outreach workers, hepatitis C outreach workers, distribution of naloxone (an opioid antagonist that can temporarily reverse an overdose), and other harm reduction (safer injection and inhalation) equipment. These services are typically provided directly to persons who use drugs by public health units, AIDS service organizations, hepatitis C programs, and other community partners.
- C. Through funding from MOHLTC, CAMH has implemented and maintains the Ontario Harm Reduction Database (the “Database”) for adoption and use by the Province’s Needle Exchange/Syringe Programs, Hepatitis C Programs, and Injection Drug Use (IDU) Outreach Programs.
- D. CAMH has developed comprehensive reporting and analytical tools for use by PHUs, HR HSPs, and the MOHLTC for use in planning, policy, quality improvement and funding accountability, as accessed through the Database.
- E. The HR HSPs will use the Database to record services provided and harm reduction equipment distributed to people who use drugs, and manage operational activities supporting harm reduction service (“Supply Management”). The data generated by the system will be used to

create information and reports to help the PHUs, HR HSPs and MOHLTC obtain more timely data about these services to support program implementation (“**Reports**”). The Database will help HR HSPs streamline their reporting and meet their accountability and reporting requirements. Finally, the use of the electronic Database will also increase the MOHLTC’s ability to monitor service-need trends, as well as provide a tool for efficient and standardized data collection.

- F. In accordance with the agreement entered into with the MOHLTC, CAMH has entered into an agreement with NEO360 for the license of a comprehensive harm reduction service software solution (i.e. The Ontario Harm Reduction Database), to be hosted by CAMH for use by the HR HSP’s for the supply management and reporting obligations described herein.
- G. CAMH will act as an agent, in respect of reports, and as the service provider to the PHU’s and HR HSP’s with respect to their use of the Database and will provide certain training services, as further described below.

NOW THEREFORE in consideration of the mutual promises hereinafter set out, the mutual benefit to be derived from the enhancement of standardized data collection and reporting, and other considerations (the receipt and sufficiency of which are acknowledged by each Party), the Parties agree as follows:
